Key Specifications/Special Features:

The 101VIP9001 is a high power jammer designed for blocking remote controlled improvised explosive devices used by terrorist

The 101VIP900-1 is using state-of-art technology for maximum performance and jamming the signals transmits to activate bombs

Jamming radius of 101VIP900-1-900 depends on several conditions such as transmitter frequency and output power, distance to receiver, and obstacles between

The system use broadband omni-directional antennas for 360° protection

Because of the variety of jamming targets and a wide range of uncertainties, we have adopted the more advanced and effective jamming signal modulation method, which will increase the jamming efficiency in each band, so that to provide security protection and ensure the safety of VVIPs
